PERFIL

I'm a FullStack developer with experience in **TypeScript**, **Next.js** and **Nest.js**, specialized in web applications and **Web3** (smart contracts in **Solidity** and Metamask in BSC). I have knowledge in VPS administration, auto-deployment with **webhooks**, and configuring **Nginx** as a reverse proxy.

EXPERIENCIA

WowWebGroup   **NOVEMBER 2024 - PRESENT**
FullStack Developer

- Responsible for creating an admin panel, the database, and securing the website.
- Implementation of auto-deployment on VPS with Nginx and webhook.

WowWebGroup   unitdreams.com   **OCTOBER 2024**
FullStack Developer

- Developed a website based on a Figma design and created an admin panel to modify website parameters.
- Configured PostgreSQL on server and auto-deployment on VPS.

Private Development   **JANUARY 2024 - OCTOBER 2024**
FullStack & SmartContract Developer

- Created a DApp connected to Metamask on the BSC network.
- Developed smart contracts in Solidity (locking contracts, NFTs, tokens, pre-sales, token burning, etc.).
- Implementation of auto-deployment on VPS with webhooks, including automated deployment of smart contracts.

La Pizza de Hugo   lapizzadehugo.com   **AUGUST 2023**
FullStack Developer

- Responsible for creating and designing the company website.
